

K

"K" as in the way Germans spell "Kompakt":
The behrotest[®] compact line of laboratory
equipment

behr
Labor-Technik

KEX 30: Soxhlet extraction, 30 ml

KSMA: Aqua regia digester for heavy metal samples

KSTA: Dissolved and readily liberated sulfide

KLFC: Readily liberated cyanide, single sample apparatus

KLFC 2: Readily liberated cyanide, 2 sample apparatus

KTC: Total cyanide apparatus

The "Kompakt" line also includes units for:

- Soxhlet 100 ml extraction
- Lipid 100 ml extraction
- Two sample unit for dissolved and readily liberated sulfide

And if you don't find what you need in our brochure, then ask us. We're flexible in solving problems.

All compact units feature:

- exclusive use of high quality components.
- Simple operation. All units are mounted on stands, hooked-up and ready to use. No more fiddling with clamps and mountings.
- Space-saving construction. All units stand on a 23 x 27 cm baseplate, including the double sample units.
- Analytical reliability. All components are fabricated to comply with official analytical procedures and safety standards.
